I benefit greatly from XM radio. I have had my XM radio for almost two years now, and before that I would have to listen to CD, or some AM radio. My truck came with a very poor quality radio, and the way Freightliner makes there truck, my reception was very bad. Listenint to CD's was my only option. Trying to drive and change CD from a Sony CD walkman can be dangerous. Anything that distracts a driver is unsafe. With my XM radio, I don't have to fiddle around with CD, or trying to find an AM station at night. My Delphi Skyfi has a large, lighted screen that makes it easy to see. The ten preset stations means I never have to take my eyes off the road too long to look for another station. And the Traffic and weather really help me out. I was in Boston last month, and the station let me know about how long it was going to take to get through downtown. This is a great benefit to me, as a truck driver. Please don't let any law to pass that would take away my right as a consumer to get the programming that I want, need and pay for.
Thank you,
Duane Vasquez
